TECHNOLOGY THAT CAN COVER YOU FROM ANY ANGLE.

FORWARD COLLISION ALERT.  
This available feature continually monitors how close your vehicle is to the vehicle in front of you. If the system determines that a front-end collision with a detected vehicle is imminent, it alerts the driver to a potential crash. It also warns the driver if their Equinox is following a detected vehicle much too closely.

SIDE BLIND ZONE ALERT.  
New on 2016 models, this available feature uses radar sensors on both sides of the vehicle to “look” for other vehicles in your side mirror blind zones and indicates their presence with LED-lit symbols in the exterior mirrors.

REAR CROSS TRAFFIC ALERT.  
Also new for 2016, this available system uses the same radar sensors as the Side Blind Zone Alert to help alert drivers to approaching traffic when backing up. Visual and audible alerts are triggered if moving vehicles are detected.

LANE DEPARTURE WARNING.  
If you unintentionally change lanes without a turn signal, this available camera-based system sends an alert. The camera, mounted near the inside rearview mirror, reads traffic lane markings when identifiable and provides audible and visual alerts.

REAR VISION CAMERA.  
Standard on Equinox, the rear vision camera displays a view of the area immediately behind the vehicle on the 7-inch diagonal color touch-screen — making it easier to see what’s behind you while backing up.

SAFETY STARTS WITH YOU.  
Safety features are no substitute for the driver’s responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Read the vehicle Owner’s Manual for more important safety information.
