WHY JUST GO FROM A TO B

When imagination can take you everywhere

The road. A simple path, really. And yet it’s come to mean so much more. Perhaps the reason roads are special is that every road leads us to somewhere we’re not — but could be. At Chevrolet, roads are our springboards. They challenge us, taunt us and guide us to create better, more exciting, more ingenious ways to move through life. Roads drive us to places we’ve never been before. And we’ll never stop seeking out new ones.
INTRODUCING THE BEST OF BOTH WORLDS: Chevrolet Volt is the everyday electric car with gas for longer trips. Volt lets you drive purely electrically. Then a gas-powered generator seamlessly switches on to take you even farther. With this kind of innovation, Volt has been recognized as the "Leader in Strategic Vision's 2013 Total Quality Award" for Best Mid-Size Car and one of the "10 Best Green Cars of 2013" by Kelley Blue Book’s KBB.com.4

"Volt remains the standard for cars that combine plug-in battery electric power with gasoline," says Sierra magazine after Volt topped the Sierra Club’s list of hybrid plug-ins. No wonder Volt is America’s best-selling plug-in.4 That’s the power of American ingenuity.
drag coefficient. So as it slices through the air, Volt can travel up to an EPA-estimated 38 miles in EV mode without using a single drop of gas. Plus, Volt uses its gas-powered range extender to travel up to 380 miles. So you won’t have to worry about being stranded.

EFFICIENCY IN EVERY DETAIL. Volt wasn’t made to simply strike the eye. It was sculpted with powerful purpose. Chevrolet designers used extensive wind tunnel testing to shape everything from the unique front grille to the side view mirrors and rear spoiler. This attention to detail gives Volt an extremely low drag coefficient. So as it slices through the air, Volt can travel up to an EPA-estimated 38 miles in EV mode without using a single drop of gas. Plus, Volt uses its gas-powered range extender to travel up to 380 miles. So you won’t have to worry about being stranded.

AERODYNAMIC ATTRACTION
AN INTERIOR WITH A FLOW OF ITS OWN

YOUR PERSONAL DATA CENTER  This unique cockpit-inspired design incorporates a full center console and sporty bucket seats for all four passengers. Enjoy thoughtful details including two 7-inch color display screens. The screen behind the steering wheel gives you a convenient look at the Driver Information Center. The touch-screen in the center console puts efficiency data, driving mode selections and music choices right at your fingertips.

INNOVATIVE SPACE  Look around. You’ll see cup holders, storage bins and door panel storage. There’s even a dedicated umbrella pocket and another convenient storage area for the standard 120V charging cord. Plus, Volt offers up to 10.6 cubic feet of cargo space. The split rear seats can also be folded to provide even more room.

1 Cargo and load capacity limited by weight and distribution.

Volt interior with available Jet Black leather appointments with Ceramic White accents.
Volt interior with available Pebble Beige leather appointments with suede inserts.
Convenient in-dash storage area.

with a choice of four driving modes that you can easily shift between to best suit your driving conditions.

THE ENERGY-EFFICIENT POWER OF BOSE Using a proprietary design, the available Bose® system delivers premium, high-quality audio — but is 30% smaller, 40% lighter and uses 50% less energy than automotive sound systems with comparable performance.

STRAIGHTFORWARD TECHNOLOGY The Volt command center is packed with advanced technology streamlined in two simple, straightforward interfaces. Instead of turning a key, you push a blue button. Rather than looking at dials and needles, you check two interactive LCD screens for feedback based on your particular driving style. The screens allow you to learn how to get the most out of each charge. And Volt is programmed with a choice of four driving modes that you can easily shift between to best suit your driving conditions.

SELECT YOUR STYLE Premium Cloth is standard. But you can also opt for available leather-appointed, heated seats in Jet Black with Dark Argent or Ceramic White accents, or Pebble Beige with sueded inserts and Dark Argent accents.
Chevrolet 2-Year Scheduled Maintenance Coverage is included with the purchase or lease of a new 2014 Chevrolet Volt. This fully transferable program is in addition to the Volt standard:

- 5-year/100,000-mile Powertrain Limited Warranty
- 5-year/100,000-mile Roadside Assistance Program
- 8-year/100,000-mile Courtesy Transportation Program
- 3-year/36,000-mile Bumper-to-Bumper Warranty
- 8-year/100,000-mile Battery and Voltec Component Limited Warranty

As an electric drive with a backup, what makes Volt innovative beyond conserving time and money is what happens when the power of electricity and gas seamlessly come together. First, you can drive gas-free for an EPA-estimated 38 electric miles. Then, the onboard gas-powered generator automatically engages to generate electricity so you can drive a total range of up to 380 miles on a full charge and a full tank of gas.

900 MILES BETWEEN FILL-UPS

Volt in Silver Ice Metallic with available features.

1 EPA-estimated 38-mi all-electric range based on 98 MPGe (electric); 35 MPG city/40 highway (gas). Actual mileage may vary.
2 Based on national average of 12 cents per kWh and 13.2 kWh for a full charge ($1.58). Electricity costs vary. Check with your provider for your rates.
3 Based on EPA estimates. Visit fueleconomy.gov for details.
4 EPA-estimated 38-mile range based on 98 MPGe, plus 342-mile range based on 35 MPG city/40 highway. Actual range varies with conditions.
5 Covers only scheduled oil changes with filter and tire rotations according to your new vehicle’s recommended maintenance schedule for up to 2 years or 24,000 miles, whichever comes first. Does not include air filters. Maximum of four service events. See participating dealer for other restrictions and complete details.
6 Whichever comes first. See dealer for details.

By charging regularly, Volt drivers are averaging 900 miles between fill-ups. With this kind of convenience, Volt drivers are charging for only about $1.60 a day and compared to the average new vehicle sold in the United States, they’re saving over $1,300 a year in fuel costs. Making Volt nothing short of an intelligent way to drive.
REGENERATIVE BRAKING
This innovative system captures energy normally lost during braking and converts it into electricity that’s then stored in the battery. By recycling some of the energy generated from the vehicle’s motion during braking, the battery is supplied with recaptured energy without producing additional emissions.

CHARGE FROM ALMOST ANYWHERE
Choose a standard 120V charging unit that allows you to plug into an electrical outlet and fully charge the battery in about 10 to 16 hours,2 based on charging levels and outside temperature. Or you can opt for an available 240V charging3 station that cuts down your charging time to approximately four hours.

LITHIUM-ION BATTERY
The advanced 16.5-kWh lithium-ion battery was designed in a T-shape to maximize space efficiency and minimize weight for long-lasting durability. The battery also has a liquid cooling and warming system to ensure a longer life.

GENERATOR
When the battery runs low, the gas-powered generator extends the vehicle’s total range up to 380 miles1 and provides electricity to sustain the battery charge until Volt can be recharged.

CHARGE MADE SIMPLE
IT’S TIME TO GIVE GAS A RUN FOR ITS MONEY.

ELECTRIC DRIVE UNIT
The wheels of Volt are continuously propelled by the electric drive unit, with electricity either from the battery or the gas-powered range-extending generator. This makes Volt a significant step forward from earlier hybrids and less reliant on charge stations than battery electric vehicles.

CHARGE AHEAD WITH ASSURANCE
To make sure you’re always covered, the battery is backed with an 8-year/100,000-mile4 Battery and Voltec Component Limited Warranty.

CHARGE PORT
Whether you want to charge from your garage, a friend’s home or a public charging station while you’re on the go, it’s completely possible by simply plugging in.
Responsive Acceleration. The moment your foot hits the pedal, the adrenaline rush is immediate. It's a direct connection: head, right foot, motor, power. Without a traditional transmission, 273 lb-ft of low-end torque has nowhere to go except to the tires and pavement. And with the ability to reach a test-track speed of 100 mph, plus four versatile driving modes that you can easily shift between, it's clear that driving electric doesn't mean sacrificing performance.

Normal Mode. In Normal mode, Volt will use the energy stored in the battery before seamlessly transitioning to the gas-powered generator. Volt always starts in Normal mode, which operates smoothly for the majority of driving scenarios. And as always, it's electric when you want it, gas when you need it.

Sport Mode. Sport mode delivers heightened responsiveness and feedback. Select Sport mode if you desire more aggressive acceleration, although the car's efficiency may be reduced slightly compared to Normal mode.

Hold Mode. Hold mode puts the battery's charge on hold—saving it for later. This mode is ideal for those with routes that begin with highway driving. This allows drivers to save their electric range for the pace of stop-and-go city traffic.

Mountain Mode. Driving in this mode helps Volt maintain a power reserve for climbing long, steep grades.
MYVOLT.COM is your personal website. This is where you can go to check battery charging status, remote start your Volt, and lock and unlock your doors. You can also view your fuel efficiency history and share information via Facebook® and Twitter.

SCREEN PLAY: The efficiency gauge and two energy feedback screens provide a quick glance at how adeptly you’re driving. In the center stack, the 7-inch diagonal color touch screen shows energy usage and power flow that you can use to learn how to drive more efficiently. You can also switch screens to access infotainment capabilities through Chevrolet MyLink® where you can integrate your smartphone, music and more.

Volt in Silver Ice Metallic with available features. MyLink functionality varies by model. Full functionality requires compatible Bluetooth and smartphone and USB connectivity for some devices.

ABsolute TRACK THE EFFICIENCY OF YOUR VOL T AND SET GOALS TO MAXIMIZE IT.
CHEVROLET MYLINK®: The 7-inch diagonal color display touch-screen of Chevrolet MyLink® Radio is your direct source to an array of entertainment options. Use touch controls or voice commands to access Pandora® Internet Radio and OnStar® Smart_simps®. Enjoy commercial-free music with SiriusXM Satellite Radio. Organize your music library with Gracenote.® With the available navigation system, easily plan and navigate trips. You can also keep track of real-time traffic reports with three trial months of available SiriusXM NavTraffic. Volt also comes with Turn-by-Turn Navigation, which enables you to download directions from MapQuest® through eNAV, standard for three years with the OnStar® Directions & Connections® Plan.

MYCHEVROLET MOBILE App5
Easily find your Volt in the parking lot by creating a reminder with a photo and mark on a map. Get roadside assistance when you need it while completing other convenient tasks.

ONSTAR REMOTELINk MOBILE App6
Check the battery level and charge mode of your Volt right on your smartphone. Schedule a future charging time and receive alerts that tell you when your battery is fully charged or when your car is plugged in. This app also lets you contact an OnStar Advisor, lock or unlock your doors, and precondition your Volt from almost anywhere you have cell phone service.

VOLT DRIVER CHALLENGE MOBILE App7
Join a community of Volt owners engaged in friendly competition. Track your efficiency and set goals to maximize it. Then one-up other Volt drivers to earn achievements, scorecards and a spot on the leaderboards. Available for download from the App Store® and Google Play.™

A COMPLETE CONNECTION

CHEVROLET MYLINK® EMPOWERS YOUR DRIVING EXPERIENCE.

1. MyLink functionality varies by model. Full functionality requires compatible Bluetooth and compatible smartphone, and is dependent on your data plan. 2. Data plan rates apply. 3. If you subscribe after your trial period, subscriptions are continuous until you call SiriusXM to cancel. See SiriusXM Customer Agreement for complete terms at siriusxm.com. Other fees and taxes will apply. 4. Visit onstar.com for coverage map, details and system limitations. 5. Requires Apple iOS 6 or Android platform. 6. Available on select Apple, Android and BlackBerry devices. Services vary by device, vehicle and conditions. Requires active OnStar subscription, which is standard for the first three years. 7. Available on select iPhone and Android devices. Requires active OnStar subscription, which is standard for the first three years. iPhone is a trademark of Apple Inc., registered in the U.S. and other countries. App Store is a service mark of Apple Inc. Google Play is a trademark of Google Inc.
Government 5-Star Safety Ratings are part of the National Highway Traffic Safety Administration's (NHTSA's) New Car Assessment Program (www.SaferCar.gov).

Included in Enhanced Safety Package 2 which requires available Enhanced Safety Package 1.

Visit onstar.com for coverage map, details and system limitations. Services vary by model and conditions. OnStar acts as a link to existing emergency service providers. Not all vehicles may transmit all crash data.

Air bag inflation can cause severe injury or death to anyone too close to the air bag when it deploys. Be sure every occupant is properly restrained. Always use safety belts and the correct restraint for your child's age and size. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Follow state or local laws on infant safety. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with a passenger air bag. See the Owner's Manual and the child safety seat instructions for more safety information.

TOp SAFETY RATING: The 2014 Volt received a 5-Star Overall Vehicle Score for Safety from the National Highway Traffic Safety Administration. When it comes to safety, this accolade speaks volumes.

PREVENTATIVE MEASURES: Your drive begins with the aid of an available rear vision camera that alerts you to certain obstacles when traveling in reverse at low speeds. You can also activate an audible alert that helps caution pedestrians who may not hear Volt driving quietly in electric mode while approaching at low speeds. The standard StabiliTrak® Electronic Stability Control System with Traction Control is also there and helps you keep on the course being steered in case of adverse conditions.

Available Forward Collision Alert1 uses a forward-facing camera to alert you of slowing vehicles. The available Lane Departure Warning monitors lane markings and warns you if you are drifting out of your lane.

IMMEDIATELY RESPONSIVE: Volt automatically relays crucial information to the OnStar Command Center via OnStar Automatic Crash Response.3 There, trained OnStar Advisors utilize GPS technology to pinpoint your exact location and can request that assistance be sent right away—even if you’re unable to respond. OnStar is standard for three years.
There are miles of reasons why Volt owners quickly become Volt enthusiasts. By charging regularly, they are averaging about 900 miles between fill-ups. What’s not to love?

ERIC, WEST NYACK, NY

“Almost every day I walk into the office and somebody asks me a question about my Volt. What really blows them away is when I tell them I almost never go to the gas station, despite the fact that they see me driving to work every day. I fill up my Volt maybe once every couple of months! And that feels absolutely wonderful.”

PRIYA, LOS ANGELES, CA

“Volt is an awesome car. The body style and the interior design and everything is really cool, but more than anything, I love the gas mileage. I am probably going to the gas station about once a month... probably less.”

NOBLE, ALEXANDRIA, VA

“I bought the car because I could eliminate gas from my budget, and it’s been 4,200 miles since my last trip to the gas station.”

1 EPA-estimated 38-mile all-electric range based on 98 MPGe (electric); 35 MPG city/40 highway (gas). Actual mileage may vary.

OWNERSHIP EXTRAS

OVERVIEW OF YOUR 2014 CHEVROLET Volt

SAFETY

WARRANTY INFORMATION

The 2014 Chevrolet Volt 2-Panel Moonroof Limited Warranty. Every 2014 Chevrolet passenger car, light-duty truck, SUV and crossover comes with a 100,000 miles/5-year (whichever comes first) transferable Powertrain Limited Warranty. Plus, you get 100,000 miles/5 years (whichever comes first) of the 24/7 Roadside Assistance Program, and 100,000 miles/5 years (whichever comes first) of the Courtesy Transportation Program, and much more. See dealer for details. 

NEW VEHICLE LIMITED WARRANTY

GM vehicles registered in the USA are covered for 100,000 miles/5 years (whichever comes first). The complete vehicle is covered, including tires, for your limited Chevrolet dealership and corrosion coverage resulting from defects. Repairs will be made to correct any vehicle defect, and most warranty repairs will be made at no charge. In addition, rust-through corrosion will be covered for 100,000 miles/5 years (whichever comes first). See dealer for details.

BATTERY LIMITED WARRANTY

Battery voltage and battery components are covered for 100,000 miles/5 years (whichever comes first). See dealer for details.

IMPORTANT INFORMATION

ENERGY: Chevrolet products are equipped with engines produced by GM Powertrain or other suppliers to GM worldwide. The engines in Chevrolet products may also be used in other GM and non-GM models.

ASSEMBLY: Chevrolet vehicles and their components are assembled or produced by the General Motors Company, its affiliates or suppliers to GM worldwide. We sometimes find it necessary to purchase Chevrolet vehicles with them. When the specific components are included, we will specifically name them. Some of our options may be available only after your vehicle is assembled, so we reserve the right to change the equipment you ordered if we find the components you ordered are unavailable.

CERTIFICATION: In all service and repair vehicle electrical systems (including battery), wireless services and GPS satellite signals to be available and operating for features to function properly. In drive or service that uses emergency service providers. Subscription Service Agreement required (1-800-ROAD-TOWN 9-1-800-762-3866) or see owner user guide for other Terms and Conditions. Privacy Policy, details and system limitations.

A MODEL OF CHILD SAFETY: Always safely secure your child for your child’s age and size. Even though you can see your child in the rearview mirror, they may not be properly restrained. Infants and young children should be properly restrained in a rear-facing infant restraint in the rear seat of any vehicle equipped with a passenger air bag. See your owner manual and child safety seat instructions for more safety information.

A IMPORTANT WO RDS ABOUT THIS CATALOG: We have tried to make this catalog comprehensive and factual. We reserve the right, however, to make changes on any item, without notice, in colors, materials, equipment, specifications, styles and availability. We are not responsible for typographical errors or other printing mistakes. We cannot be responsible for errors or omissions of any kind, especially for parts not included in this catalog or for those that may have been discontinued. We will do our best to bring these errors to your attention.

WEBSITES TO ACCESS: Information about your vehicle, its features, competitive information. Excludes other GM vehicles.

SERVICE AGREEMENT: Call 1-888-4ONSTAR (1-888-466-7827) or visit onstar.com for OnStar service and GPS satellite signals to be available and operating for features to function properly. Volt battery and Voltec components are covered for 100,000 miles/8 years (whichever comes first). See dealer for details.

SIRIUSXM: SIRIUSXM and all related marks are registered service marks of XM Satellite Radio Inc. All related marks on this list are trademarks of SiriusXM Radio Inc. See a representative of OnStar for features and options.
